

Community Resource Planning **ENERGY AUDITS**

Section 9006 – The Renewable Energy and Energy Efficiency Program, through USDA-Rural Development, offers grants, guaranteed loans, and combination grant/guaranteed loans to help agricultural producers and rural small businesses purchase and install renewable energy systems and make energy efficiency improvements in rural areas.

As a prerequisite, an energy audit is required as a prerequisite for an Energy Efficiency Improvement grant program under the Rural Energy for America (REAP) Program administered by the Department of the USDA Rural Development.

I&S Group’s Mechanical and Electrical Engineers can perform the necessary energy audit as part of your grant application. The energy audit will formulate energy calculations, cost and energy savings and payback period for new improvements.

If you have any questions or would like to learn more about how we may be able to assist you, please do not hesitate to contact us.
