

Health Care MINNESOTA VALLEY HEALTH HOSPITAL ENTRANCE AND CLINIC ADDITION

Le Sueur, Minnesota

To continue to provide high quality health care to the region, Minnesota Valley Health Center, in cooperation with their care partners, committed to a long term master plan including expansion of the clinic and improvements to the entrance, lobby, and reception areas.

The new expansion includes significant additional space, improvements to patient privacy and convenience, and updated technology. The new space houses 23 exam rooms, along with associated procedure, lab, and administrative spaces. The airy lobby provides an inviting space for patients and visitors as they arrive through the new entrance, which is protected from the elements by a large canopy.

A new visitor parking area and convenient patient drop off area are now conveniently located. Staff also appreciate the additional parking space near employee entrances.
