

The South Central Service Cooperative (SCSC) serves over 100 member institutions by cooperatively hosting administrative and educational services for the region. Their new 12,000 square-foot facility enables them to more effectively enhance the education of over 10,000 students utilizing state-of-the-art technology. The organic nature of the floor plan is reflective of the original (SCSC) architectural design, while the exterior is a repetition of the architectural pre-cast panels and elements.
