

# MUNICIPAL ENGINEERING

All aspects of infrastructure including transportation, water systems, utilities, parks and trails are at the foundation of every community's success. They influence our daily lives and have a lasting impact on our environment. It is important work that demands highly skilled engineers—engineers that are true experts in the technical aspects of complex public projects.

At ISG, our civil engineers take their job a step further. They look at infrastructure as a responsibility. Whether functioning as an extension of the city or on a per project basis, they put their expertise delivering efficient, high-quality solutions for planning, design, technology and administrative needs. By integrating budgets, planning and prioritization, ISG helps cities protect their infrastructure assets and plan for maintenance and improvements. We have a long, successful history of effectively engaging community stakeholders and building open lines of communication with citizens, contractors, municipal staff and regulators. This collaboration and attention to project details ensures our communities thrive in healthy fiscal and physical environments.

## EXPERT SERVICES

- Water Supply, Treatment & Distribution Systems
- Wastewater Collection & Treatment
- Stormwater Management
- Licensed Water & Wastewater Operations
- Transportation Planning & Design
- Street Rehabilitation & Construction
- Streetscaping
- Pavement Management & Maintenance Plans
- Facility Planning & Design
- Subdivision & Land Development Planning & Review
- Land-Use Planning
- Parks, Trails, Recreational Facilities & Fields
- Pedestrian & Vehicular Bridges
- Landfill Planning & Design
- Utility Investigations & Reconstruction
- Utility Rate Studies
- Parking Studies
- Zoning & Subdivision Ordinances
- Code Preparation
- Asset Management & GIS Mapping
- Capital Improvement Planning
- Resource Planning & Grant Writing
- Community Engagement
- City Engineering
- Municipal Representation
- Bidding Assistance & Contract Administration
- Construction Observation
