

Vision is an integral part of all commercial endeavors. Whether opening a new facility or renovating an existing space, inspiration is what fuels action. Be it an idea, opportunity, or passion, these are the intangible catalysts ISG helps commercial partners across the U.S. translate through strategic planning and design. Through active collaboration, customized solutions, and a dynamic range of experience, ISG supports commercial clients with an integrated suite of services, from site due diligence and planning through technical system engineering, final interior detail selection, and beyond.

Positioned at the forefront of market trends, ISG employs cutting-edge technology to produce unique spaces, expedite results, and streamline operations. ISG's reach extends across the country, with individual and firm-wide licensure figures totaling more than 40 states. ISG's industry leading solutions increase energy efficiency and promote value engineering for sustainable designs that strengthen bottom lines in all of a client's ventures.

FACILITY FAÇADES

ISG incorporates branding, landscaping, signage, and lighting to create attractive building exteriors that provide a wow factor to highway passersby and impress clients upon first visit.

BRAND

integration for optimal exposure

Cambria
Le Sueur, MN

ISG's multi-disciplinary team provides a holistic perspective, and develops intentional designs that infuse a client's mission into the heart of the planning process. This allows clients to integrate their brand into a building's layout, communicating company culture and image to all who enter the space. ISG strives to attain a complete understanding of each project through close coordination with clients, outside agencies, owners, and other key stakeholders, facilitating coordinated efforts with a single point of contact and comprehensive in-house expertise. Integrating cost-effective practices and remaining sensitive to budgetary needs, ISG solutions remain economically feasible while maximizing a building's return on investment. The resulting designs promote lasting, functional facilities that support every day operations, and give clients the freedom to focus on advancing their business.

INSPIRING INTERIORS

ISG's interior designers focus on improving employee functionality for commercial clients, as well as enhancing their customers' experience and incorporating branding throughout the space.

COLLABORATIVE WORK SPACE EXPERTISE

When designing for partners with constantly shifting facility and work space needs, ISG incorporates resident staff stations, touch-down places for traveling employees, and collaborative breakout areas in an effort to provide the flexibility needed for day-to-day activities. Customized movable wall systems are frequently utilized to save space and eliminate construction waste, while creative, open team spaces offer opportunities to share technologies and generate new ideas. Complemented with movable lounge furniture and interior designs reflecting corporate brand styles, these modern systems are also capable of being reconfigured as the organization's space needs evolve.
